

ENVIRONMENTAL POLICY STATEMENT

OFS regards environmental excellence as a fundamental value in performance of its activities. Accordingly, OFS respects the environment and responds to the principles of sustainable development and sound environmental management. OFS undertakes, in this way, to effectively harness and conserve the resources it uses. In order to meet its environmental commitments, OFS applies the following basic principles, which are included as key factors in the OFS Environmental Management System:

- **Integration** of environmental management and sustainable development concepts in the company's corporate strategy using environmental criteria documented in all planning and decision making processes.
- **Rational** use of resources and reduction of waste production, emissions, discharges and any other type of environmental impact, through the application of continuous improvement programmes and the establishment of environmental objectives and target.
- **Commitment** to comply with all relevant legislative practices in all of its facilities and locations. OFS also commits to report on all measured results.
- **Conservation** of operational sites and their surroundings by adopting measures designed to protect flora and fauna species and their natural habitats.
- **Implementation** of cleaner and more efficient technologies provided that they are available and economically viable for the company. OFS also encourages and influences the research and development of renewable energies where applicable.
- **Promotion** of OFS employees' awareness of environmental protection by communicating this OFS Environmental Policy to all employees. OFS also promotes the development of specific training programmes and interaction with relevant stakeholders.
- **Requiring** its contractors and suppliers to implement and develop environmental policies which are aligned with those of OFS. These OFS policies are communicated to all applicable contractors and suppliers.
- **Promotion** of rational energy consumption among employees and contractors.

OFS is committed to the above environmental principles and incorporates these as part of its Environmental Management System. These policies are applied across all the environmental processes and activities of OFS.
